PROFESSIONAL SUMMARY

Lead UX Researcher with 10+ years of experience delivering end-to-end research for complex consumer products, including AI-driven and global digital services. Deep expertise in mixed-methods, from lab-based and remote usability testing to discovery interviews and large-scale quantitative programmes. A trusted strategic partner to Product and Design leadership, translating user insight into evidence-based product decisions, with a proven track of building people-first digital products.

PROFESSIONAL EXPERIENCE

Senior UX Researcher | **Meta** | Nov 2021 – Present | London, UK

Leading foundational and evaluative research for complex consumer products (AI, spatial computing, digital services). Architecting research strategy to shape product roadmaps and inform go/no-go decisions at leadership level.

- Owned the research roadmap and prioritisation across 5 product areas, serving as strategic research partner to stakeholders and leadership to translate insight into roadmap strategy and go/no-go decisions, and provide a trusted research voice in cross-functional planning forums.
- Conducted end-to-end research studies across the full product lifecycle, from generative discovery to lab-based and remote evaluative usability testing and iterative prototype testing, translating findings into clear, actionable product and business decisions.
- Led usability testing programmes that surfaced friction points and validated design iterations, directly shaping UI/UX improvements across product flows.
- Collaborated with Data Science to synthesise qualitative findings with behavioural analytics, directly contributing to a 15% uplift in product adoption through research-driven decisions.
- Developed AI-assisted research workflows and agents that accelerated synthesis and raised the speed and quality of insight delivery across the research function, ranked in the top 5% of AI-native researchers at Meta.
- Mentored junior researchers and contributed to research best practices, embedding methodological rigour across the wider research community.

Consumer & User Researcher | **Deliveroo** | Sep 2019 – Oct 2021 | London, UK

Led mixed-methods research across a multi-sided marketplace spanning 12 international markets, translating customer and market insight into product decisions that improved conversion and supported commercial growth.

- Owned and executed mixed-methods research across 12 international markets into customer discovery and decision-making behaviour on a transactional marketplace platform, informing localised product and UX changes that improved conversion.
- Served as the strategic research partner to Product, Marketing, and Operations, assessing and prioritising research demand across competing business needs in a fast-moving, multi-sided environment.
- Managed external research agencies and directed global fieldwork across concurrent multi-market projects, maintaining quality, pace, and scope under tight timelines.
- Operated in a fast-paced, ambiguous environment shaped by frequent organisational and product change, adapting research approaches while consistently anchoring design and product decisions in user-centred insight.

Associate Research Director | **MetrixLab (Toluna)** | Aug 2013 – Sep 2019 | London, UK

Led research programmes for global consumer brands — specialising in customer research for decision-making, branding and new product development.

- Designed and executed 100+ large-scale studies spanning Advertising Effectiveness, Brand Health Tracking, and Product Testing informing product, marketing, and business strategy for global FMCG brands (Unilever, Heineken, Nestle, Google).
- Conducted market research for 20+ brands to deepen understanding of their customers, motivations, behaviors and market trends and to improve the quality of decision-making across marketing, product innovation, and advertising.
- Line-managed a team of 4 researchers with full P&L accountability, fostering a culture of methodological excellence and customer-first thinking.

SKILL & TOOLS

Research Methods

Generative design research, Ethnography, Co-design, Discovery interviews, Concept testing, Usability testing (moderated & unmoderated), Diary studies, Survey design, Statistical analysis (descriptive & inferential), Participant recruiting & screening, Reporting & synthesis, Workshop facilitation, Strategic frameworks.

Tools & Platforms

Figma, Miro, UserTesting, Dscout, Maze, Lookback, Qualtrics, SurveyMonkey, SPSS, Looker, SQL, Python (in progress).

AI

LLM-powered synthesis & AI-assisted research workflows and agents (Claude, Gemini, ChatGPT) • Research agents & tooling • Prompt engineering • AI-assisted analysis.

EDUCATION

MSc Marketing Research (Strategy) Tilburg University, Netherlands | 2012–2013

BSc Marketing & Communication Athens University of Economics and Business, Greece | 2005–2010

ADDITIONAL

Languages: English (fluent), Greek (native)

Interests: Personal finance & investing, generative AI, anthropology, history, creative writing
