

Chris Bouloumpasis

Lead UX Researcher

c.bouloumpasis@hotmail.com • +44 7448 691454 • London, UK • [linkedin.com/in/chris-bouloumpasis-15271053](https://www.linkedin.com/in/chris-bouloumpasis-15271053)

PROFESSIONAL SUMMARY

Lead UX Researcher with 10+ years of experience delivering end-to-end research for complex consumer products, including AI-driven and global digital services. Deep expertise in mixed-methods, from lab-based and remote usability testing to discovery interviews and large-scale quantitative programmes. A trusted strategic partner to Product and Design leadership, translating user insight into evidence-based product decisions, with a proven track record of building people-first digital products.

PROFESSIONAL EXPERIENCE

Lead UX Researcher | Meta

Nov 2021 – Present | London, UK

Leading end-to-end research across complex, global consumer products, including AI-driven experiences, partnering with Product and Design leadership to shape product and strategy.

- Conducted end-to-end research studies across the full product lifecycle, from generative discovery to lab-based and remote evaluative usability testing and iterative prototype testing, translating findings into clear, actionable product and business decisions.
- Led usability testing programmes that surfaced friction points and validated design iterations, directly shaping UI/UX improvements across product flows.
- Acted as a strategic research partner to Product and Design leadership, translating user research into roadmap strategy and go/no-go decisions, serving as a trusted research voice in cross-functional planning forums.
- Collaborated with Data Science to synthesise qualitative findings with behavioural analytics, contributing to a measurable uplift in product adoption through research-driven decisions.
- Developed AI-assisted research workflows and agents that accelerated synthesis and raised the speed and quality of insight delivery across the research function — recognised as a leading AI-native researcher.
- Mentored junior researchers and contributed to research best practices, embedding methodological rigour across the wider research community.

Consumer Insights and User Researcher | Deliveroo

Sep 2019 – Oct 2021 | London, UK

Led mixed-methods research across a multi-sided marketplace spanning 12 international markets, translating customer and market insight into product decisions that improved conversion and supported commercial growth.

- Owned and executed mixed-methods research across 12 international markets into customer discovery and decision-making behaviour on a transactional marketplace platform, informing localised product and UX changes that improved conversion.
- Acted as a strategic research partner to Product, Marketing, and Operations, assessing and prioritising research demand across competing business needs in a fast-moving, multi-sided environment.
- Managed external research agencies and directed global fieldwork across concurrent multi-market projects, maintaining quality, pace, and scope under tight timelines.
- Operated in a fast-paced, ambiguous environment shaped by frequent organisational and product change, adapting research approaches while consistently anchoring design and product decisions in user-centred insight.

Associate Research Director | MetrixLab UK (Toluna)

Aug 2013 – Sep 2019 | London, UK

Led large-scale quantitative and qualitative research programmes for global consumer brands.

- Designed and executed 100+ large-scale studies spanning Advertising Effectiveness, Brand Health Tracking,

and Product Testing — informing product, marketing, and business strategy for global FMCG brands (Unilever, Heineken, Nestlé, Google).

- Conducted market research for 50+ brands to deepen understanding of their users and improve the quality of decision-making across marketing strategy, product innovation, and advertising.
- Line-managed a team of 4 researchers with full P&L accountability, fostering a culture of methodological excellence and customer-first thinking.

SKILLS & TOOLS

AI: LLM-powered synthesis & AI-assisted research workflows and agents (Claude, Gemini, ChatGPT)

Design: Figma • Miro

Tools: UserTesting • Dscout • Maze • Lookback • Qualtrics • SurveyMonkey • SPSS • Looker • SQL • Python (in progress) • Google Workspace

Methods: End-to-end study design • Participant recruiting & screening • Lab-based & remote usability testing (moderated & unmoderated) • Iterative prototype testing • Survey design • Diary studies • Ethnography • Concept testing • Statistical analysis (descriptive & inferential) • Sample sizing • Reporting & synthesis

EDUCATION

MSc Marketing Research (Strategy) – Tilburg University, Netherlands | 2012–2013

BSc Marketing & Communication – Athens University of Economics and Business, Greece | 2005–2011

ADDITIONAL

Languages: English (fluent), Greek (native) | Interests: Personal finance & investing, generative AI
